

Folded Mountains

1. In the drawing above, locate and label the anticline, the folds, the syncline and the area of erosion.
2. Match the word from column B to its description in column A:

Column A	Column B
_____ a. upfold of rock layers	Appalachian
_____ b. wavy layers of rock	erosion
_____ c. downfold of rock layers	syncline
_____ d. example of folded mountains	anticline
_____ e. removes and changes rock	folds

3. What type of forces, tensional or compressional, form folded mountains?
4. What is a monocline? Draw a diagram of a monocline below:
